MEDICAL HYDROGEN GAS & NITRIC OXIDE

Super Drink

Introducing the Revolutionary HYDRO SHOT Natural Medicine:

Why your Body Needs Hydrogen Gas

Molecular Hydrogen (H2)

Molecular hydrogen (H2) is a natural, 100% safe **MEDICAL** gas. It is the smallest molecule and most effective antioxidant in the universe and does what no other substance can do!

Due to its tiny size, it can cross the blood-brain barrier and easily penetrate **ALL** cell membranes. This gives it the unique ability to access DNA within the cell where it has protective and therapeutic action. Additionally, the unrivalled property to

NEUTRALIZE harmful free radicals SELECTIVELY, makes H2 the most superior, novel antioxidant in existence.

1000+ scientific studies demonstrate that H2 has therapeutic action in over 170 different human and animal disease models, and essentially every organ of the human body.

Hydrogen as a medical gas is growing rapidly because it has immediate medical applications to help with the top 8/10 disease-causing fatalities as listed by the Centers of Disease Control. Latest research also demonstrates it has therapeutic potential in coronavirus disease.

The clinical and pre-clinical studies demonstrate that H2's properties rival those of currently available prescription drugs. HYDRO SHOT provides an effective dietary supplement that is safe to consume by woman and men daily, to improve health, vitality, and performance.

Why Your Body Needs Nitric Oxide

Nitric oxide, like oxygen, is essential for our cells. We literally cannot live without it, and the older we get the less Nitric Oxide we produce. The link between cardiovascular health and Nitric Oxide levels has been called the greatest discovery in medicine.

Increases Energy Production

Promotes Brain Function

Nobel Price Medicine

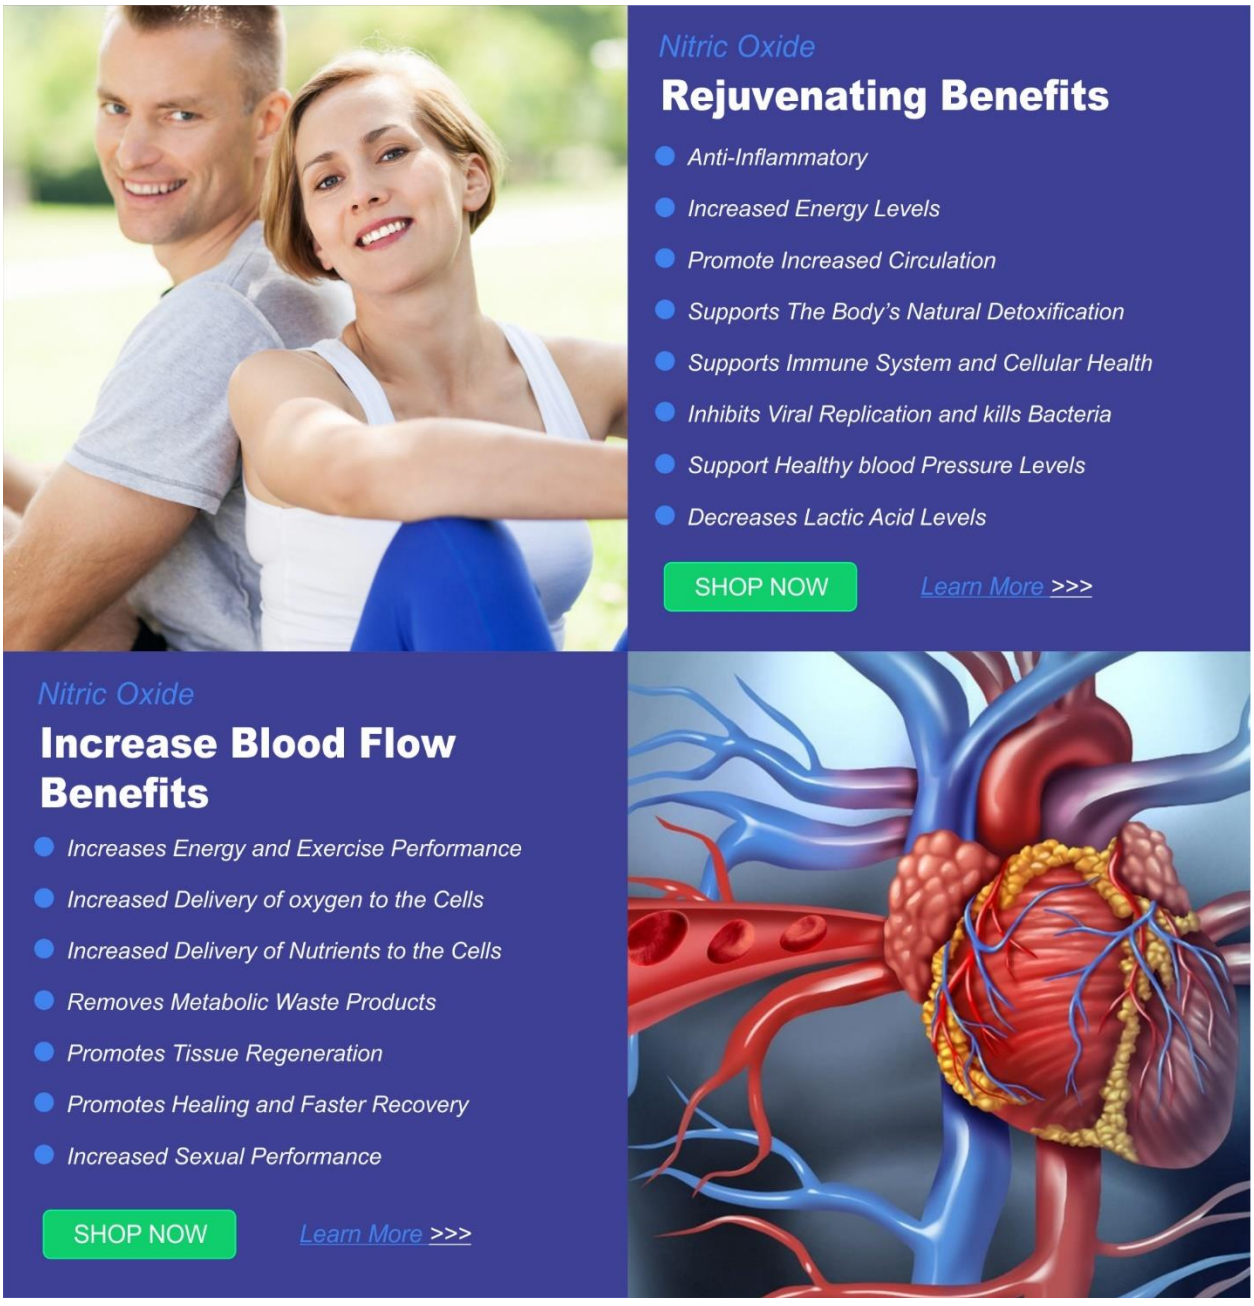
Promotes Immune Function

Increases Blood Circulation

A Nobel Prize was awarded in 1998 for the discovery of Nitric Oxide's effect on our cardiovascular system. Nitric Oxide, the "miracle molecule", is able to carry messages at the cellular level and causes the blood vessels to relax in our bodies, promoting arterial dilation and increased blood flow.

Nitric Oxide is not just important, it is critical to your health and youth. By its very nature alone, it is directly linked to a healthy body and its ability to function in an optimal way.

There are over 60,000+ scientific publications demonstrating the importance of Nitric Oxide for optimal health and wellness.



Are You Nitric Oxide Deficient?

Just as blood flow decreases with age, so do Nitric Oxide Levels, which may contribute to neurodegeneration, neuropathy, impaired immune system, and slow rates of recovery and healing.

- *Poor Memory or Concentration*
- *Lethargic / Low Energy*
- *High Blood Pressure*
- *Irritability, Depression, or Anxiety*
- *Less Stamina / Endurance*
- *Decreased Heart Function*
- *Insomnia or Difficulty Sleeping*
- *Decreased Libido*
- *Asthma or Poor Lung Function*

Ever wonder why children heal faster with less scarring than older people? Or why a scratch on the face heals faster than a scratch on the foot? It is largely due to difference in blood flow.

WHAT IS
HYDRO SHOT
AND HOW TO USE

The ground-breaking HYDRO SHOT formula is a proprietary blend of pure magnesium, malic acid and nitric oxide producing citrulline that generates maximum H2 infused beverages in less than 3 minutes.

Simply drop one zenii scientific HYDRO SHOT effervescent tablet into 300-500ml of any non-carbonated, non-alcoholic drink and enjoy H2 infused beverages on the go. For highest concentration of H2 (therapeutic dose) use pure water.

How much molecular hydrogen does each tablet produce?

HYDRO SHOT offers the highest concentration (over 9 PPM) of medical hydrogen gas on the market today in pure water. Our groundbreaking formula makes it possible to get therapeutic levels of H2 in an open container.

How to Use

Create fresh, super saturated, medical hydrogen gas infused water, anytime and anywhere. Simply drop one zenii scientific HYDRO SHOT tablet into a glass of water and watch as a nano cloud of molecular hydrogen supersaturates the water. It will be ready to drink in less than 3 minutes. Other non-carbonated, non-alcoholic beverages can also be infused with the HYDRO SHOT tablet but the H2 concentration is higher when used in pure water.

Do not swallow tablet.

Recommended Usage

Start with 1 serving best on an empty stomach, but not necessary, followed by a second serving during the day. Can be increased to 4-6 servings per day for adults.

Consider your level of stress and/or physical activity as well. HYDRO SHOT hydrating drinks are especially beneficial for prevention and fighting diseases, increasing athletic performance and speeding up healing and recovery from injury.

Is it possible to drink too much H2 infused water?

H2 is not a foreign substance to the human body, but natural. The FDA and the scientific publications validate that H2 is 100% safe, has no side-effects whatsoever, and can never be overdosed. Any hydrogen gas that your body does not use will naturally dissipate.

What does it taste like?

Zenii scientific HYDRO SHOT tablets leave water with a smooth, fresh mouth feel, lemon flavored taste, that customers say tastes lighter and fresher than plain water. The magnesium can leave a mild metallic taste for some users, but so mild as to not be off-putting.

What kind of container do I need?

No special vessel needed! Its simplicity is brilliant: Just drop a tablet in a glass of any non-carbonated, non- alcoholic beverage, for highest H2 concentrations use pure water and wait until the tablet has fully dissolved into millions of nano H2 bubbles. No need for a closed lid container, special hardware, or transportation worries.

Drink immediately for maximum effect.
